

Designs were modified in a kind of **laboratory**

The children took electronic circuits apart to create control panels. They devised a **rocket manual** with specific instructions to describe intricate buttons and levers.

The children discussed all the features and functions, **testing, inventing, adapting objects and ideas.**

Alien characters were created as children realised that they themselves were too big to fit in their latest rocket.

'Maybe we can build a new rocket if our rocket has gone.
I'm just making something' Max (4:1)
